

Empower Your Edge

Hyperlocal To Hyperscale Data
Center Solutions

**Your Way, Anywhere Around the
World, Where You Need an Edge**

Everything You Need, All In One Place

EdgeConneX® work with some of the world's leading network, content, cloud and emerging technology providers to define, build and deliver highly proximate, high-powered, purpose-built data center capacity that brings the Edge to our customers and our customers to the Edge.

As the pioneer in defining and building the Edge, we operate more than 50 data centers in 40+ markets across the world, from Hyperlocal to Hyperscale. Our carrier-neutral facilities offer diverse networks and multi-cloud access, while our comprehensive services ensure that your deployments are always secure, available and visible.

50+ Data Centers

Edge, hyperscale and Build To Suit

40+ Unique Markets

Unique markets worldwide with more in development

1,500,000+ Data Points

Data points monitored by EdgeOS every 15ms

250+ MW

Deployed and in development worldwide

Carbon Neutral

North America and hyperscale data centers

99.999% Uptime

Uptime over the past 3 years

Our carrier-neutral facilities offer diverse networks and multi-cloud access

EdgeOS

Next-gen DCIM across all Edge ConneX data centers

200+ Deployments

Top 5 Companies

Top 5 companies by market cap worldwide are our customers

EdgeConneX Data Center Solutions

Delivering the capacity, proximity and power you need anywhere in the world, underpinned by the experience you demand.

Hyperscale Data Centers

Rapidly built to your exact specifications. The hyperscale capacity and power you need.

From 10MW to over 100MW, we have successfully built and deployed hyperscale data center solutions that deliver performance and growth for some of the largest, most demanding customers in the world.

Far Edge Data Centers

Extend the Edge with hyperlocal architecture. Enable emerging technologies.

Our Edge data center footprint and capabilities extend the reach of your Edge applications to handle the unprecedented volume of ultra-low latency data that demands hyperlocal capacity, compute and connectivity.

Edge Data Centers

The lowest latency. The highest performance. The Edge where you need it.

Our purpose-built data centers are designed and deployed in conjunction with every customer for optimal placement of network and infrastructure at the Edge, delivering a superior end-user experience.

Built-To-Order Data Centers

100% customer defined data centers. Wherever you need an edge.

Hyperlocal to Hyperscale. Any size. Anywhere. We work with you every step of the way to rapidly deliver the data center solutions your business demands – the scale you need, where you need it, when you need it.

Giving You The Edge

With more than a decade building and operating data centers around the globe, we offer a full range of data center solutions and have the experience to deliver the scale you need, in any market, on your schedule.

Location

As the pioneer in defining and building the Edge, we operate 50+ data centers in 40+ markets across the world, from Hyperlocal to Hyperscale. Our carrier-neutral facilities offer diverse networks and multi-cloud access, while our comprehensive services ensure that your deployments are always secure, available and visible

Cloud Services

Move cloud services and applications closer to the enterprise improving business critical issues including performance, security and cost

Project Management

Our expert project management team partners with our customers and all providers to identify the optimal locations to Empower Your Edge

Scalability

Data center solutions from 100kW to 100MW, with just-in-time capacity delivery that scales as your needs and demands grow

Speed

We rapidly locate, secure, build and deliver data center solutions where our customers need to be

Network Diversity

Diverse access to many of the world's largest MSOs, ISPs, fiber and mobile providers, and on-ramps for major Cloud Service Providers

High-Density Power

Available at up to 30kW per rack, we enable the highest levels of efficiency and capacity for servers and applications of the future

Connectivity Solutions

Extensive interconnection solutions enable direct access to over 100 network service and cloud providers worldwide

Operations and Support

EdgeOS self-service management tool offers single-pane-of-glass visibility into every aspect of data center operations across all facilities

Innovative Pricing

Pioneering business model and wholesale economics offer pricing with predictable financials that directly correlate to cost

Working with some of
the best companies in
the world and continually
adding more customers,
connections and partners
